

TweetSwap

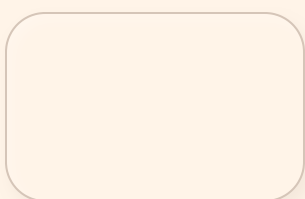

From a message to a swap.

A plain-language quote desk for Solana. The clay message bubble carries opposing swap arrows: conversation and exchange in one readable shape.

Type and forms

Rubik 700 for the mixed-case TweetSwap signature and headlines. Rubik 400-500 for reading. IBM Plex Mono for exact amounts and token identifiers.

Molded shapes, soft contact shadows and generous rounded corners support the Claymorphism direction. Keep every financial value crisp and easy to read.

Product status

Read-only Solana quotes and command previews. X integration is planned. A Pump.fun launch is planned; no launch date, ticker or token address is supplied.

Do not describe previews as executed trades, quote amounts as guaranteed fills, or planned social integration as live.

Asset handling

Keep the supplied clay icon and illustration intact and proportional. The wordmark is outlined SVG and needs no installed font. Reserve the full left third of X banners for the profile image. Use the included desktop/mobile profile proof before posting.
